## THE CHALLENGE

**The sales team was spending hours searching for companies and contacts within their target market to source slowing down the pace of opportunity creation**

The sales team at IBISWorld was spending hours searching for companies to target and identifying contacts within those companies to prospect. They used another data provider prior to partnering with ZoomInfo, which had a lot of inaccurate and out-of-date contact information and slowed the process down even more. Once they realized their current process was costing them time and money, Isaac Satten, Client Services Manager at IBISWorld, decided to test ZoomInfo and never looked back.

"Prior to ZoomInfo, we were not only spending a lot of time searching for companies and contacts to target, we were dealing with inaccurate direct dial phone numbers and email addresses. Since partnering with ZoomInfo, we've been able to increase the efficiency and effectiveness of our prospecting by drilling down our searches by geographic location, company size, management level, and more. ZoomInfo also provides us with the accurate contact information needed directly within the platform."
